Only once a day...

A single daily dose of 'Bimez' provides effective sulphonamide therapy

*"... 'Bimez' is as effective as sulphadimidine whilst having some advantages over it."**

'Bimez' combines the safety and efficiency of 'Sulphamezathine' with the advantages of persistent therapeutic blood levels. The once-daily dosage is of great convenience especially in children. Absorption is rapid and complete, acetylation in the blood is low and side effects are rare.

**The Practitioner 1961, 186, 764.*

'Bimez' is available in two convenient dosage forms:

'BIMEZ' TABLETS for routine treatment. Each tablet contains 'Sulphamezathine' (Sulphadimidine B.P.) 0.375 gramme; sulphadimethoxypyrimidine 0.125 gramme. Issued in containers of 12, 50 and 500.

'BIMEZ' SUSPENSION especially suitable for children and the elderly. A teaspoonful (3.5 ml.) is equivalent to one tablet.

Basic N.H.S. costs: 12 tablets 3/8d.; 30 ml. suspension 4/-. 500 ml. also available.

"Why don't you see the doctor about that cough?"

WHEN coughing interferes with sleep, 'Thorpax' Syrup can be relied upon to reduce the frequency and severity of attacks. A single dose gives rapid relief and remains effective overnight, so permitting uninterrupted sleep. Its moderate local anaesthetic action will alleviate sore throat or "pharyngeal tickle", and its mild spasmolytic effect helps to protect against bronchospasm.

'Thorpax' is non-narcotic and contains no codeine. It does not cause respiratory

depression, gastric disturbances or constipation and can be given safely over long periods.

For his tomorrows . . . we work today

Helpless—but not unhelped! While he sleeps the unceasing search goes on for new or better antigens to protect him from infectious diseases once regarded as unavoidable hazards. Take whooping cough, the world's No. 1 killing disease of babies in the first year of life. By perfecting precise methods of making and testing pertussis vaccines Glaxo research has materially helped to raise whooping cough immunisation to its present high level of effectiveness. Significantly, it was Glaxo workers who were asked to assist in the preparation of the British Standard Pertussis Vaccine which was subsequently accepted as the International Standard. Every batch of Whooping Cough Vaccine Glaxo (and combined antigens containing it) measures up to these same high standards.

The primary immunising course with Whooping Cough Vaccine Glaxo is three 1 ml injections (or three $\frac{1}{2}$ ml injections if the Glaxo half volume vaccine is used); the first injection should be given at not later than three months of age.

GLAXO PRODUCTS FOR PROTECTION

The following vaccines are available in two concentrations, which provide a full dose of antigen in either 1 ml (standard vaccine) or 0.5 ml (half-volume vaccine)

*Have you
a "yen"
to travel?*

You can't travel abroad, on holiday or business, without foreign currency, whether it's Dollars, Francs, Escudos, Florins, Schillings, Deutschemarks, or Pesetas. The Ulster Bank can supply you with currency and Travellers Cheques for most of the principal countries of the world. What's more, this service is available to customers and non-customers alike. Any of the Bank's branches will be glad to give you further information, and at a large number of them, including this office, the required currency—as well as Travellers Cheques—can be obtained over the counter, on production of your passport. Remember, travel to the Continent—or farther afield—free of financial worries, starts at your branch of the Ulster Bank.
